

VertiRack™

SUPERIOR DESIGN FOR ULTIMATE CONVENIENCE

VertiRack™ Truck Body Ladders

VertiRack™ Truck Body Ladders give roof rack owners the access needed to ease loading and unloading of your roof mounted ladder rack. **VertiRack™** high strength ladders are manufactured of industrial grade, internally reinforced, anodized aluminum extrusions to provide a stable, safe loading and unloading position.

VertiRack™ products feature 6105-T5 high strength, anodized aluminum construction, with stainless steel hardware; for a lifetime of oxidation free and rust free service.

VertiRack™ Truck Body Ladders utilize high strength mounting brackets available in a choice of 2 ladder depths to suite your particular mounting situation.

VertiRack™ Truck Body Ladder brackets can be located at any position along the ladders height.

VertiRack™ Truck Body Ladders feature rubber treaded slip resistant ladder rungs for safe ladder usage.
